## Eligibility and Completeness Review Checklist for Project Subapplications

Applications submitted to FEMA that do not contain at least the basic components listed below may be immediately denied because there is no method to determine eligibility without this data. Additional information may be requested during FEMA review. This information is required for all submittals, including potential substitutions.

Application Component	Yes	No	Comment
General			
Documentation included in the subapplication?			
Is this a phased project?			
Technical Assistance Needed? Subapplicant is encouraged to contact the State (Applicant) to request application development assistance. FEMA resources may be available but will only be provided if requested by the Applicant.			
Applicants	-		
Eligible Applicant is identified (State or local government; eligible Private, non-profit organization; or Indian Tribal government)			
Applicant participates in the National Flood Insurance Program			
Plan Requirement	•		
Project conforms with State Mitigation Plan per 44 CFR Part 201			
Project conforms with Local Mitigation Plan per 44 CFR Part 201			
Project conforms with Indian Tribal Mitigation Plan per 44 CFR Part 201			
Scope of Work			
SOW describes the proposed solution			
Alternatives considered as part of the decision-making process			
Project includes photographs of each structure and general project area			
Project includes appropriate maps that orient the reviewer to the entire project area			
Latitude and longitude are provided for each structure			
SOW justifies the proposed solution as the best option over a range of alternatives			
Project site is clearly identified using maps, GPS coordinates, or other means			
Project addresses a repetitive problem or a significant risk to public health			

Project solves a problem independently or constitutes a functional portion of a solution       Image: Constitutes a functional portion of a solution         Schedule	Application Component	Yes	No	Comment
A work schedule of 3 years or less is provided         Image: Content of the schedule of 3 years or less is provided           A work schedule of 3 years or less is provided that supports the SOW         Image: Content of the schedule of a years or less is provided that supports the SOW           If project requires phased or incremental funding, the budget reflects amounts estimated for each funding increment         Image: Content of the schedule of				
Budget/Match Source       A cost estimate/budget is provided that supports the SOW       If project requires phased or incremental funding, the budget reflects amounts estimated for each funding increment       If project requires phased or incremental funding, the budget reflects amounts estimated for each funding increment         Non-Federal cost shares and match sources are identified       Project should identify potential Duplication of Benefits such as Insurance, Shaml Business Administration loans if information is available during project development         Cost-effectiveness and Feasibility       Project includes a benefit-cost analysis, or alternate cost-effectiveness and request for consideration under 5 percent HMGP discretionary funding         Project includes a benefit-cost analysis, or alternate cost-effectiveness and request for consideration under 5 percent HMGP discretionary funding       Project includes a benefit-cost analysis, or a narrative support in cost-effectiveness and request for consideration under 5 percent HMGP discretionary funding         Project includes technical information to support proposed action. For example, level of protection for drainage projects, engineering data to support proposed semic retrofits, and population data to support proposed semic retrofits, and population and documentation to demonstrate conformance with 44 CFR Part 9.6 and Part 10         Project includes and available information relating to known historic, archaeological, or environmentally sensitive areas (e.g., critical Coastal Barrier Resources Act or Otherwise Protected Area)       All appropriate Federal, State, and local agencies have been consulted       Project includes environmental coordination letters or contact information to obtain required coordination	Schedule

Application Component	Yes	No	Comment
SF-LLL, Disclosure of Lobbying Activities			
Considers long-term changes to the area it proposes to protect and has manageable future maintenance and modification requirements			
Acquisition Demolition / Relocation Information			
Project confirms compliance with timelines and all other criteria set forth in 44 CFR Part 80 requirements			
Project includes Voluntary Participation Documentation for each property			
Documentation (if needed) that the property owner is National of United States or qualified alien			
For properties that are to be relocated, will the structure be relocated outside of the Special Flood Hazard Area?			
Elevation Information			•
Project identifies the Base Flood Elevation or Advisory Base Flood Elevation			
Project includes finished floor elevation (Elevation certificate is preferred)			
Project includes proposed elevation height of the structure			
Designed and Implemented consistent with ASCE/SEI 24-05			
Safe Room Information			•
Project includes population size and basis			
Designed and implemented consistent with FEMA P-320 or FEMA P-361			
Wind Retrofit Information			
Project includes proposed level of protection			
Designed and implemented consistent with P-804			
Drainage Information			
Project includes initial technical information to support size, costs and local permitting requirements
